

Enhancing & Maintaining an Environmental Management System (EMS)

INTRODUCTION

Build the practical skills and knowledge you need to develop or enhance an Environmental Management System (EMS) with this 2 day course. Discover the actions, tools and techniques required to implement or improve an inherited EMS, including procedural and process information.

DURATION

2 Days, 9.00 -17.00

WHO SHOULD ATTEND

- People involved in planning and/or coordinating the implementation process for a system addressing environmental issues
- People who have been assigned the task of establishing or inheriting an EMS
- Decision makers in the implementation process
- Those wanting to understand the implementation process

COURSE OBJECTIVES

- Identify environmental aspects and impacts that create the baseline from which an EMS is created and developed
- Recognise cultural change and management issues at all levels, which play a role in the implementation process
- Establish the initial steps to be taken in developing or improving an EMS
- Develop skills in identifying and mapping environmental processes and developing procedures and relevant documentation
- Recognise the appropriate resources and capabilities necessary for maintaining an EMS

COURSE CONTENT

- | | |
|---|--|
| • What is an EMS | • How to implement or improve an EMS |
| • The ISO 14001 model and an ISO 14001:2015 Standard Revision Overview | • Developing an Environmental policy |
| • Common features of an EMS | • Identifying environmental risks, aspects and impacts |
| • Cultural change and implementation including developing a strategic context | • Operational controls and emergency planning |
| • Managing environmental improvement actions | • Monitoring, measuring and reporting |
| • Training & communication | • Developing and maintaining EMS documentation |
| • Maintaining an EMS to achieve continual improvement | • Internal auditing and management review |

WHAT ARE THE BENEFITS?

As a contributor to Continuous Personal Development this course offers valuable day to day knowledge and skills essential to an efficient environmental management system. Will help to develop or improve an effective and efficient environmental management system which gives genuine value whilst avoiding some of the pitfalls.

Enhancing & Maintaining an Environmental Management System (EMS)

IN-HOUSE COURSES

Offering better value for money, they can be designed to closely match your specific requirements
